projects 📌

Job Board 📌   May 2018
Refactored an HTML5 site using React for an interactive UI. Submission form and job listings are controlled with state and props to efficiently render the desired content.

JavaScript | React | Node.js | REST | Cypress | HTML5 | CSS3 | Firebase

Movie Finder 🎬   May 2018
Search for a movie to find out the plot and year of release. End-to-end testing in Cypress and integrates with OMDB API.

JavaScript | REST| HTML5 | CSS3 | Firebase | Bootstrap | Cypress

Tile Pong 🏓   March 2018
Built a 2D game that gets data from an external source, manipulates and transforms it, then updates the results live in the game.

JavaScript | RESTful Web Services | HTML5 | CSS3 | Firebase
